

Intrusive Igneous activity and associated features

1. Make a copy of Figure 3.18. Label all the features correctly.
2. Choose two of the features and explain how each one is formed.
3. What processes need to happen before we see intrusive igneous features on Earth's surface?
4. Name one intrusive igneous feature that is associated with granite.
5. Why do rocks that form deep in Earth's crust have large crystals?
6. What rock in South Africa is associated with volcanic pipes?
